Regarding: UFH: Data logger

Dear customer

there might be something wrong with your data logger.

You'll realise it in the following way. It's of a paramount importance that you should read the following instructions carefully before trying to modify the setups.

First you need to be connect with the control,

- then click on edit data logger (Image 001)
- choose view (Image002)
- shift to "Sample + Save Conditions" (Image 003)
- check if "Sample Time" and "Min Time" has been factory-adjusted on "25 ms" (Image 004) "25 ms" is the right setup -

If the setup is not "25 ms", **than you have to delete the data logger configuration 1** and 2. (Mind, that all records will be deleted.) Do this as described.

- choose delete by "Edit data logger." You need to delete both files (Image 005)

- then close dialog (Image 006)

You also have to delete data logger files 1 and 2.

- click on "Load Data Log" (Image 007)
- choose button delete and delete both of them. (Image 008)
- then close dialog (Image 009)

Create a new data logger configuration. Mind out, that you need to create 2 new files

- click once again on "Edit Data Logger" (Image 010)
- choose button "New" (Image 011)
- then click button "Load" (Image 012)
- choose on and open up the file "log_file_1.DLC" (Mind, that you get this file additionally)
- then click "OK" (Image 013)
- choose "New" once again (Image 014)
- choose "Load" once again (Image 015)
- choose on and open up the file "log_file_2.DLC" (Mind, that you get this file additionally)
- then click "OK" (Image 016)
- then close dialog (Image 017)

-Nachrichtenteil als Anhang-

"25" ms is right.

If "Sample Time" and "Min Time" has been setted at "25" ms , you needn't change anything.

If the setup is not "25 ms", than you have to delete the data logger configuration 1 and 2. (Mind, that all records will be deleted.)

1. Delete data logger-configuration 1 and 2

choose delete by "Edit data logger." You need to delete both files.
